MILDEW-DEFENSE™

Stopping the Little Guy.

Duro Textiles, LLC now offers industry-leading protection from mildew, mold and fungi for outdoor printed and solid colored furniture products. The system is called Mildew-Defense™ and provides fabric protection against microscopic organism and fungal growth. Mildew-Defense™ works by constantly eliminating potential mold, mildew and bacterial threats on fabric. Printed and solid colored furniture fabrics remain colorful and odor free. This product can also be layered with other Duroshield™ products to provide protection from multiple environmental and man-made fabric threats.

Mildew-Defense™ provides outstanding microscopic organism growth resistance. In fact, most will never see any mold or mildew blemishes form even if fabric is stored away slightly damp. Comparable products often have an unpleasant scent and do not last multiple seasons. Mildew-Defense™ passes both AATCC-30 (fungal) and AATCC-147 (bacterial) test methods.

Fabric sample with NO anti-microbial treatment (Yellow area under attack)

Fabric sample treated with anti-microbial (Yellow area mildew-free)

Mildew-Defense™ versus the Competition:

- ⚠ Eliminates odor formation
- ⚠ Anti-bacterial protection
- ⚠ Unaffected by weather
- ⚠ Safe for family and pets
- ⚠ Can be layered with other Duroshield™ products
