

WEAR-DEFENSE™

Longevity through Technology

Now you can provide outdoor printed and solid colored fabrics with the highest level of abrasion protection.

Wear-Defense™ Benefits:

- ◆ Protects the print and fabric surfaces from abrasion
- ◆ Proprietary polymer system
- ◆ Minimal fabric color shift
- ◆ Can be layered with other Duroshield™ products
- ◆ Safe for family and pets

Longevity through Technology.

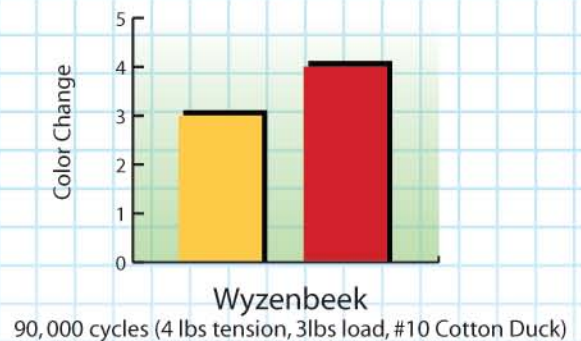

Duro Textiles, LLC now offers an outstanding abrasion and wear resistance layer system for printed and solid colored outdoor furniture fabrics. This system is called Wear-Defense™. Typical outdoor fabrics start showing their age from repeated abrasion cycles such as people sitting down and getting up from furniture. Wear-Defense™ utilizes a proprietary polymer system that provides a protective layer for printed and solid colored fabrics. Wear-Defense™ does not affect commonly used industry fire resistance tests, Class I UFAC Method-1990 and CAL-117 Section E.

Wear-Defense™ provides outstanding Taber and Wyzenbeek abrasion resistance on printed and solid colored fabrics all at an affordable price. Colors stay brilliant and fabric fibers remain protected. Even with this outstanding protection the fabric's hand is virtually unchanged.

ASTM-D3884 Abrasion Testing:
Wear-Defense™ vs. No Wear-Defense™

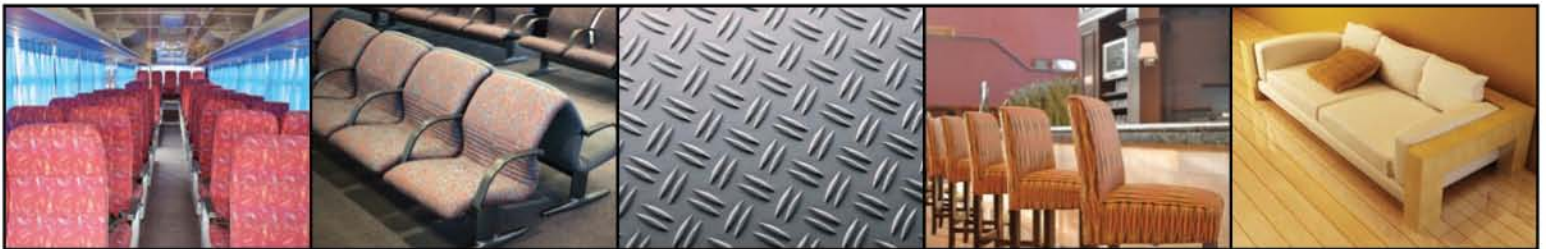

ASTM-D4157 Abrasion Color Change:
Wear-Defense™ vs. No Wear-Defense™

Wear-Defense™ versus the Competition:

- ◆ Products retain that "Newly Bought" appearance
- ◆ Proprietary polymer technology minimizes wear and abrasion
- ◆ Wyzenbeek and Taber tested and proven
